

Professional Broadband

**IS YOUR BANDWIDTH SUFFICIENT FOR YOU NEEDS?
DOES IT CHOKE AT 4PM?
DO YOU NEED BROADBAND FAILOVER OR LOAD BALANCING?**

**So called "8Mbps" bandwidth frequently provides less than 256Kbps upload
BT expects to offer its clients 24Mbps broadband by 2009
Safeserve's ADSL2+ offers 24 Mbps downstream and 2.5Mbps upstream
and the new symmetric wireless WiMAX services from 2Mbps up to 10Mbps**

AVAILABLE NOW

Essential for data back-up

Essential for remote and VPN connections to office servers

Essential for large email attachments

safeserve.com
managed email services for business

For companies with large amounts of data to transfer, bandwidth intensive email deliveries or challenging VPN demands, Safeserve's ADSL2+ WiMAX challenges SDSL and leased lines at a fraction of the cost.

ADSL2+

- Safeserve ADSL2+ provides up to 24Mbps downstream and up to 2.5Mbps upstream bandwidth - bandwidth well in excess of conventional ADSL, Leased Lines and SDSL, both upstream and downstream, at a fraction of the cost.
- Our services are delivered over a state-of-the-art dedicated network. No more 50:1 and 20:1 contention ratios, just consistently high performance, even at busy times.
- Fixed IP address for remote access and VPN support.
- 8-16 static IP addresses available for office use.
- No port, usage or time limits.
- Choice of high quality wireless routers with WAN balancing and failover to other broadband service providers including cable and WiMax.
- Installation 5-10 working days.
- Immediate support access.
- Remote maintenance available.
- VPN between sites configured.
- Cost-effective solutions integrated with hosting, email and remote back-up.

WiMAX - Wireless Internet in Central London

- From 2Mb to 10Mb symmetrical service.
- Truly independent, end-to-end network.
- No data limits.
- Highly secure to US Government standard.
- Highly reliable - 99.5% Quality of Service guarantee.
- Totally flexible and scalable – add services and capacity as and when you need.
- Installed within 10 days – and usually within a day or two.
- 30%- 70% typical cost saving over leased line.
- Avoid single point of failure Internet access risk when configured for auto-failover with ADSL2+
- Perfect for VoIP connections, provides business grade telephony without requiring landlines.
